Filing: <https://www.sec.gov/Archives/edgar/data/2079102/000207910226000002/0002079102-26-000002-index.htm>

How to read this: these are new SEC private-offering filings, not announced rounds. "Raising" is the target the company stated on its filing, not a confirmed closed round, and "sold so far" is what the filing reports sold. Names come from Item 3 of the latest filing, exactly as filed, so nobody here is upgraded to a title the filing does not state, and directors are left off entirely because we do not point cold outreach at a board. Websites and one-line descriptions appear only where we verified them against the company's own site. Not a consumer report: this briefing is not for hiring, credit, insurance or other eligibility decisions about any person. Prepared for you and your firm, so please do not republish it.

What is checked and what is not

Phone numbers in this file are fictional 555 lines. Takeoff Radar never publishes an issuer's real phone number.

The press line is illustrative. We do not hold a verified per-company press status, so it shows the template's shape rather than a checked fact.

Directors named in a filing are deliberately left off this sheet. We do not point cold outreach at a client's board, so the only people listed are executive officers.

Amounts are as filed. A stated target is what the filer declared, never a confirmed close.
